AAEM and Healthmonix Partner to Give Emergency Physicians a Clearer Path Through MIPS Reporting *New member benefit provides preferred pricing and experienced support throughout the reporting process*

Milwaukee, WI, September 2, 2026 — Emergency physicians spend their days making critical decisions for patients. To help keep complex Merit-based Incentive Payment System (MIPS) reporting from adding to their administrative burden, the American Academy of Emergency Medicine (AAEM) has partnered with Healthmonix to provide members with preferred pricing on MIPSpro, a licensed application on Healthmonix Prism™ and access to experienced reporting support.

MIPS reporting requires physicians to understand detailed requirements, manage performance information, and prepare data for submission to the Centers for Medicare & Medicaid Services. For physicians already balancing demanding clinical and administrative responsibilities, the process can require significant time and attention.

Through the partnership, AAEM members can use Healthmonix Prism to manage their quality reporting information in one place, identify potential issues before submission, and receive support throughout the process. Together, these resources provide members with a clearer and more manageable path to completing their MIPS reporting.

Emergency physicians already carry an extraordinary clinical and administrative workload. They should not have to navigate a complicated reporting process without the right support," said Vicki Norton, MD FAAEM, President of AAEM. "This partnership gives our members access to trusted tools and knowledgeable guidance so they can approach MIPS reporting with greater clarity and confidence."

"Emergency physicians shouldn't have to become MIPS experts to succeed in quality reporting. We built Prism to carry that complexity so clinicians can stay focused on their patients," said Lauren Patrick, CEO of Healthmonix. "We're proud to stand behind AAEM's members with both the technology and the experienced support that make quality reporting something they can approach with confidence, not dread."

AAEM members can access preferred pricing by logging in to their [AAEM member account](#) to retrieve a discount code for MIPSpro. Emergency physicians who are not yet members can [explore AAEM membership](#) to access this benefit and support physician-led emergency medicine.
